Newsletter AI NoE

Welcome to the Second Edition!

This edition will feature new opportunities for development and collaboration and the upcoming events in which the new NoEs will participate.

Opportunities

ENFIELD 4th Open Call

Through TES#4 (oc4-2025-TES-02), ENFIELD aims to fund mobility-based research exchanges for **individual researchers** to address targeted **scientific and technological challenges in the field of AI**, contributing to the development of Green, Adaptive, Human-Centric, and Trustworthy AI across industrial domains such as Energy, Manufacturing, and Space.

dAIEDGE 3rd Open Call

Following the great success of their second Open Call, which attracted **more than 520 applications** from more than 33 countries, we are launching our **third and final Open Call**.

With total funding of up to **€60,000** for each of the **10 winning projects** and a duration of up to **7 months**.

News

euROBIN Strategic Research Agenda

The euROBIN SRA offers a roadmap for the future of robotics and AI in Europe.

Developed by leading experts, it addresses key questions such as Will AI alone solve robotics?, explores Control, Planning and Reasoning in the era of generative AI, and reviews Human-Robot Interaction: successes, hurdles, and remaining challenges.

With this agenda, euROBIN positions Europe at the forefront of ethical, impactful, and sustainable robotics innovation.

euROBIN featured in
IEEE Robotics & Automation Magazine

euROBIN has been featured in the September 2025 issue of IEEE Robotics & Automation Magazine, one of the field's most prestigious publications. The article presents the euROBIN hackathon scenario, where heterogeneous robots — wheeled, legged, aerial, and manipulation platforms — collaborated to complete a real-world last-mile delivery task.

This recognition highlights the value of benchmarking through hackathons and showcases euROBIN's mission to connect teams, domains, and technologies across Europe.

Introducing ELLIOT
Europe's Flagship for Open Multimodal AI

The new EU-funded project, ELLIOT aims to develop open, multimodal foundation models that can generalize robustly across real-world, noisy, and dynamic data streams.

With €25 million in funding under the Horizon Europe programme, ELLIOT brings together 30 research and industry organisations across 12 countries and will run from July 2025 to June 2029. Built for real-world impact and aligned with European values, ELLIOT aims to make Europe a global leader in robust, ethical AI.

dAIEDGE participates in
International Cooperation Day

The meeting brought together experts from around the world to discuss technologies such as blockchain, artificial intelligence, and cybersecurity, with the aim of strengthening international cooperation, fostering new partnerships, and sharing knowledge.

Upcoming events

euROBIN WORKSHOP:
Exploring the Role of Energy
in Robot Learning and Control

Exploring the Role of Energy in Robot Learning and Control

October 24th, 2025 *(full day)*
Hangzhou, China
Room: Multi-functional Hall 9 (多功能厅9)

This workshop will focus on how energy considerations can enhance robot control in complex tasks, strengthen learning-based methods, and provide a unifying framework for safe, efficient, and adaptive robot behaviour.

The three best contributions will receive prizes offered by euROBIN (€500, €300, €100)

dAIEDGE will participate in StartUp Olé

The Salamanca Conference Centre will host a new edition of StartUp Olé, consolidating its position as **one of the most relevant technology events on the current scene**.

StartUp Olé has expanded its reach to international cities such as **Miami and Marbella**, among many others, will bring together the main players in the innovation ecosystem.

dAIEDGE to participate in StartUp Olé

15th - 17th October, 2025

dAIEDGE will be a key player, showcasing its pioneering solutions in AI and Edge Computing.
